The 12th International Conference on Multimedia and Ubiquitous Engineering (MUE 2018) will be held in Salerno, Italy, April 23-25, 2018. The new multimedia solutions and ubiquitous computing environments facilitate the seamless integration of diverse kinds of intelligent devices based on multiple modalities into interoperable multimedia frameworks. These key technologies of multimedia solutions and ubiquitous computing environments interact and collaborate with each other in increasingly effective ways across a wide spectrum of consumer, business, healthcare, education, and governmental domains.

This conference provides an opportunity for academic and industry professionals to discuss recent progress in the area of multimedia and ubiquitous environment including models and systems, new directions, novel applications associated with the utilization and acceptance of ubiquitous computing devices and systems.

- **Topics** (not limited to)

1. Multimedia Modeling and Processing
2. Multimedia and Digital Convergence
3. Ubiquitous and Pervasive Computing
4. Ubiquitous Networks and Mobile Communications
5. Intelligent Computing
6. Multimedia and Ubiquitous Computing Security
7. Multimedia and Ubiquitous Services
8. Multimedia Entertainment
9. Other IT and Multimedia Applications
